STP will publish an on-line Annual Meeting Attendee List, including physical and email addresses, for all meeting attendees. This will be password protected.

Check here if you do not wish to be listed in the on-line attendee list provided to all registrants (provided login required).

STP also offers Annual Meeting exhibitor companies and corporate sponsors the opportunity to purchase a pre- or post-meeting registrant list (physical address, not email address) for approved one-time mailings about Annual Meeting events or their products or services.

Check here if you wish to be excluded from the list provided for approved 2012 Exhibitor or Sponsor mailings.

How did you hear about the STP 2012 Symposium?

Continuing Education Courses

Saturday, June 23
9:00 AM–4:30 PM

NTP Satellite Symposium: Pathology Potpourri (Free Event, Registration, Required)

Sunday, June 24
8:00 AM–12:00 Noon

CE1 (AM)—Mechanism-Based Approaches to Cardiovascular Safety Assessment

1:30 PM–5:00 PM

CE2 (PM)—Non-Traditional Applications of Clinical Pathology in Drug Discovery and Preclinical Toxicology

CE3 (PM)—ACT-Sponsored: Drug Development 101

CE4 (PM)—The Placenta As an "Immune Organ" and its Relevance in Toxicological Studies

Other Sessions—Registration is Required

Sunday, June 24

Career Development Workshop: Presentation Skills and Scientific Advocacy (8:00 AM–12:00 Noon) [Free to Registrants](#)

Monday, June 25

Lunchtime Series—Careers in Environmental Toxicology (12:30 PM–1:30 PM) [Free to Registrants](#)

Wednesday, June 25

IATP/STP Course—*Ethical Figure Adjustments for Publication (Part 2 of Responsible Authorship & Publication Practices)*
With one-on-one session. Box lunch is included.

Sponsored by IATP and STP

Electronic images of graphs, charts, blots, photomicrographs, etc. are typically provided as part of manuscript submissions to journals. With the currently available image adjustment programs, it is relatively easy to modify any of the various figures submitted along with manuscript text for publication in scientific journals. Photomicrographs captured with electronic cameras often need adjustment for white balance and require some sharpening. While global image adjustment changes are generally accepted, other electronic image adjustments are considered unethical. The purpose of this workshop is to present practical approaches and techniques for image adjustment, with emphasis on photomicrographs. Following the 90-minute presentation, individuals may bring specific questions and problem images for one-on-one interaction with imaging experts.

The session presentations will be held from 12 noon to 1:30 pm. A charge of \$50 at the time of registration will cover the cost of a box lunch. Following the presentation, individuals may interact with imaging experts at work stations. Appointments must be made in advance. *If you wish to make an appointment, select appropriate choice when registering. You will be contacted for scheduling.* Adobe Photoshop will be the primary image adjustment software used to this interactive workshop.
